PROFESSIONAL SUMMARY

Software Engineer with **2+ years of experience** developing scalable backend applications, RESTful APIs, and microservices using **Java, Spring Boot, and Micronaut**. Experienced in SQL/NoSQL databases, Apache Kafka, automated testing, CI/CD, Microsoft Azure, Docker, and secure software development practices. Strong background in building reliable services, optimizing application performance, automating testing and deployments, and collaborating across Agile engineering teams.

PROFESSIONAL EXPERIENCE

Tata Consultancy Services | System Engineer | Aug 2023 – Nov 2025

- Developed and maintained **RESTful APIs and microservices using Java, Spring Boot, and Micronaut**, implementing backend services for enterprise application workflows.
- Implemented **business logic and service-layer components**, integrating application modules to support functional and end-to-end requirements.
- Developed and optimized **SQL queries** for high-volume transactional operations, improving application performance and maintaining data consistency.
- Worked with **NoSQL databases, including MongoDB**, to support application data storage and retrieval requirements.
- Integrated **Apache Kafka** for asynchronous communication and event-driven application workflows between backend services.
- Implemented unit and integration testing using **JUnit and Mockito**, identifying defects early and improving backend code reliability.
- Performed **API testing using Postman**, validating request/response handling, authentication, business logic, integration scenarios, and error conditions.
- Designed and maintained **Selenium WebDriver and Cucumber automation frameworks**, expanding regression coverage and reducing manual testing effort.
- Integrated automated test execution into **Jenkins CI/CD pipelines**, automating regression testing and report generation and reducing overall testing time by **90%**.
- Configured **GitHub Actions/CI/CD workflows** and supported automated application builds and release processes across development environments.
- Integrated **SonarCloud, Snyk, and Semgrep** into CI/CD pipelines to perform static code analysis, security scanning, and dependency vulnerability detection, identifying code-quality issues, security vulnerabilities, and risks before release.
- Deployed and validated applications in **Microsoft Azure environments**, managing deployment configurations and application secrets while following secure development practices.
- Used **Docker** to support application development and deployment workflows.
- Collaborated with developers, QA engineers, and cross-functional teams to perform root-cause analysis, troubleshoot production/application defects, and deliver stable releases within an Agile SDLC.

ACADEMIC QUALIFICATIONS

Master of Science in Artificial Intelligence
Indiana Wesleyan University, Dallas,TX,USA | Present

Bachelor of Technology in Computer Science and Engineering
Vignan's Institute of Engineering for Women, India | August 2019- June 2023

TECHNICAL SKILLS

Programming Languages: Java, Python, C, C++

Backend & APIs: Spring Boot, Micronaut, REST APIs, Microservices, Apache Kafka

Databases: MySQL, MongoDB, Oracle

Testing & Automation: Selenium WebDriver, Cucumber, JUnit, Mockito, Postman

Cloud & DevOps: Microsoft Azure, Docker, Jenkins, GitHub Actions/CI/CD

Code Quality & Security: SonarCloud, Snyk, Semgrep

Development Tools: Git, Maven, Jira

AWARDS & RECOGNITION

- Onspot Award – Recognized for exceptional contributions to project deliverables.
- Best Team Player Award – Acknowledged for outstanding collaboration and team support.
